

# Dodge Quantis Gearmotors & Reducers

## Extending the Horizon of Gear Technology

The Baldor•Dodge Quantis product line is a modular gear drive engineered for flexibility and power density in a compact housing design. The Quantis family of products offers three types of gear reducers: In-Line Helical (ILH), Right-Angle Helical Bevel (RHB) and Motorized Shaft Mount (MSM). The Dodge exclusive E-Z Kleen finish with Stainless Steel paint and XT output seals is available for tough washdown applications.

- Accommodates input power from ¼ Hp to 75 Hp
- Torque ratings up to 119,489 in-lbs
- Helical – bevel – helical gear train offers cost effective high and low speed solutions
- Up to 94% efficient
- Four input options available for all units
- Two output flange options – B5 and B14
- Multiple output shaft interfaces
- Dimensions interchangeable with major competitors

### Applications

Troughing Belt Conveyors, Slider Bed Conveyors, Mixer Drives, Screw Conveyors, Bucket Elevators, General Industrial Machinery
