

# Renold Jeffrey Synergy Transmission Chain

## Fit It and Forget It

Renold Synergy has achieved an unsurpassed reputation as the only true high performance roller chain on the market. This is based not only on the years of research and testing that went into its design, but also the response of engineers around the world who have endorsed the wear resistance, fatigue resistance and exceptional working life they have achieved by specifying Renold Synergy.

Tests show that the wear life of Renold Synergy outlasts the competition by almost six times and it offers an average of 30% better fatigue performance than the leading competitive brands. Renold Synergy is simply the best roller chain on the market.

- Optimal hardness prevents brittleness and minimizes wear
- Unique bush bore profile ensures full contact with pin surfaces
- Three-stage pin surface treatment retains lubrication and extends wear life
- Exclusive six-stage cold extrusion process optimizes resistance to shock loads
