\*Suffix on type indicates construction:  
1 = Solid 2 = Web 3 = Arm/Spoke

\*\*Reverse mount sheave  
† Includes cap screws to be used to install bushing.

Order bushings separately from pages 5-6.

Note: cast iron sheaves may not exceed 6,500 FPM. This speed does not specify if dynamic balancing (2 plane) is required. Contact IDC Select at info@IDCselect.com to verify whether dynamic balancing is required.

Sheaves are precision machined from gray cast iron, statically balanced, painted with baked enamel finish and individually packaged.
